

Dear 6th Grade Student,

The following packet is to be completed over the summer and turned in for a test grade on the first day of school. You can choose how you want to manage your time. However, if you do 4 or 5 problems a week, you will have done all of your summer work without being overwhelmed. Of the 36 questions, 30 questions must be completed. Next to each question is blank space to show your work. In order to receive credit for your work, you must show how you completed the problem. You may use your calculator to assist you, but you still need to show the process that lead to your answer in the blank space. Thank you.

Sincerely,
The Middle School Math Team
