September 2026

Dear 8th Grade Students & Parents:

In addition to the Magnet and International Baccalaureate programs offered through the Freehold Regional High School District (FRHSD), Farmingdale students are eligible to apply to **one** of the six "Career Academies" of the Monmouth County Vocational School District (MCVSD). Like the FRHSD programs, these specialized, tuition-free, programs have an application process and offer information sessions. Information sessions and open houses will begin soon: **https://www.mcvsd.org/admissions/information-sessions-open-house/**

The MCVSD career academies are listed below. **For more information on the schools and programs, please visit https://www.mcvsd.org/schools/**.

- Academy of Allied Health and Science (located in Neptune)
- Academy of Law & Public Safety (located in Long Branch)
- Biotechnology High School (located in Freehold)
- Communications High School (located in Wall)
- High Technology High School (located in Lincroft) (flyer)
- Marine Academy of Science and Technology (located in Sandy Hook)

MCVSD is limiting the number of attendees to the information sessions, so please consult the websites to see who may attend in addition to the 8th grader. Students may only attend one information session per school, though they may attend an information session at each of the six career academies to help them decide where they might like to apply. However, **students must have attended the entire presentation for the school to which they apply or their application will be withdrawn.**

**The information sessions begin in early October and run through mid-November.** Registration is required to attend an information session.

**Check the websites for application information. The deadline to apply to an academy is November 30, 2026**. Questions regarding applications or admissions can be directed to 732-431-7942 or applications@ctemc.org.

Separate information will be forwarded for FRHSD programs and applications as it becomes available to us.

In education,
Dr. Conroy
